

# Hold-Release Market Practice

## *Disclaimer*

*The Securities Market Practice Group is a group of experts who devote their time on a voluntary basis to define global and local market practices for the benefit of the securities industry. The market practice documentation and recommendations produced by this organization are intended to solve common problems across the securities industry, from which financial institutions can derive clear benefits, to harmonize business processes and to facilitate the usage of message protocols ISO 15022 and ISO 20022. While the Securities Market Practice Group encourages the implementation of the market practices it develops, it is up to the financial institutions within each market to implement the market practices according to their needs and agreements with their business counterparts to support their businesses as efficient as possible.*

*Although the SMPG has used all reasonable efforts to ensure accuracy of the contents of this document, the SMPG assumes no liability whatsoever for any inadvertent errors or omissions that may appear thereon.*

*Moreover, the information is provided on an "as is" basis. The SMPG disclaims all warranties and conditions, either express or implied, including but not limited to implied warranties of merchantability, title, non-infringement and fitness for a particular purpose.*

*Neither the SMPG, nor any of its members and/or contributors shall be liable for any direct, indirect, special or consequential damages arising out of the use of the information published in this document, even if the SMPG or any of its members have been advised of the possibility of such damage.*

Version	6.1
Status:	Draft
Preparation date:	June 2004
Update date:	March 20
Update. Impl. date:	December 2022
Author:	SMPG

<b>Changes to previous versions</b>			
Version 5.0 December 2006 & April 2007	SR 2007	Following the creation of the MT 530 Processing change command message and discussions at ECSDA level on hold-release functionality, complete review of the PREADVICE Market Practice know called HOLD-RELEASE Market practice.  In <b>blue</b> are important <u>market practice</u> changes to the previously published MP.	All document.
	Message neutral MP revamp	Revamp of the MP for the document to be more focused on business processes and business data then messages.	All document.
Jan 2012		Cosmetic changes: qualifier ESET should be ESTT in illustrations	Pages 15,20,26,31
Oct2012 v5_1		Cosmetic changes in scenarios examples where SELL/BUYR and DEAG/REAG were reversed	Pages 14/19/25/30
Nov 2014		Minor changes following SMPG decision – PREA replaces PREV in field 20C (:20C::PREA//16x)  Same in examples	Pages 9
Version 5_3 April 2015	Adding	Addition of “Directly connected participants” in Actors and Roles table + note from SMPG for no other impact of T2S in MP.	Page 4
Version 5.4 October 2016		Addition of ISO20022 illustration	Chapter VIII

## Hold-Release MP

Version 5.5 January 2019		Change of reason code in ISO 20022 illustrations from CYCL to FUTU as transaction is still pending and not failing. Now in line with ISO 15022 illustrations	Pages 40 and 49
Version 6.0 February 2020		Partial Release added  Usage of MT54x NEWM as release / MT54x PREA as Hold message to be phased out.	
Version 6.1 September 2022		New PREL codes from the SWIFT release 2022 have been added. The usage has been described	

## I. Scope and definitions:

The scope of this document is to define a market practice for settlement hold/release process. It is the process whereas a party prevents its transactions to settle on a temporary basis. It is also the process of releasing transactions (previously on hold) for settlement.

This process is named differently in different markets: freeze-unfreeze, preadvice-release, block-unblock processes. For sake of simplicity, we will use the terminology “hold/release” in this document.

The document also provides ISO 15022 and ISO 20022 usage illustrations of this market practice.

## II. Actors and Roles:

Two Roles are involved in this process:

1. Instructing Party

The party instructing to hold/release a transaction.

2. Executing Party

The party executing the instruction to hold/release a transaction.

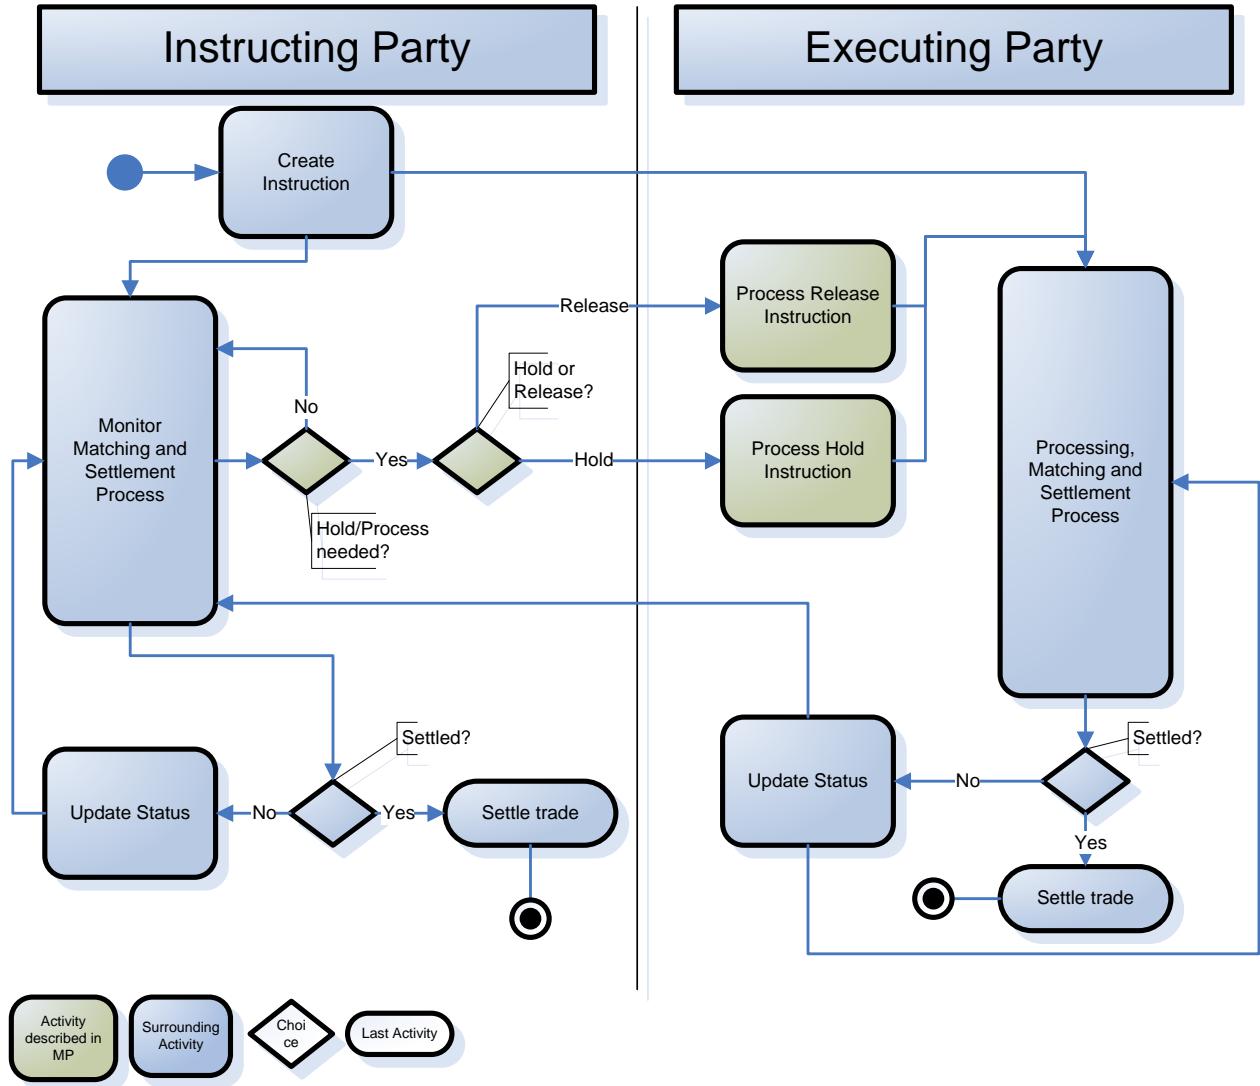

The Actors that would typically play those roles are:

Instructing Party	Executing Party
Central Securities Depository (CSD) participant, Directly Connected Participant	Central Securities Depository (CSD)
Client of Central Securities Depository (CSD) Participant (eg, Investment Manager)	Central Securities Depository (CSD) Participant (eg, Custodian)

Hold / Release functionality has become generally available in European markets due to introduction of T2S and CSDR. In other markets availability can vary, usage of the feature depends on SLA between Instructing Party and Executing Party.

### III. Activity Diagrams:

Note: This activity diagram focuses on the specific process of instructing a settlement instruction on hold or not and of requesting the modification from on hold to released, and/or vice versa. It also includes the status reporting linked to such a process. It does NOT include any other parallel or related processes not directly linked to this market practice.

Descriptions of the activities	
Instructing Party	Executing Party
<b>Create Instruction:</b> Instruction of the original instruction with status on hold or released.	<b>Processing, Matching and Settlement Process:</b> Not described in details, the focus is on hold/release.
<b>Monitor Matching and Settlement Process:</b> Not described in details, the focus is on hold/release.	
<b>Hold/Release process needed?:</b> If the instruction needs to be released or held, go to <b>Hold or Release</b> Activity	

<b>Hold or Release?:</b> If the instruction is on hold and need to be released, go to <b>Process release instruction</b> activity. If the instruction is released and need to be put on hold, go to <b>Process hold instruction</b> activity.	<b>Process release instruction:</b> Release the on hold instruction. If the instruction was already released, no action
	<b>Process hold instruction:</b> Hold the released instruction. If the instruction was already on hold, no action.
<b>Settled NO/YES:</b> If NO, go to <b>update status</b> activity. If YES, go to <b>settle trade</b> activity.  Applies to all instructions, resulting from a split or not.	
<b>Update Status:</b> Update the status based on the instruction statuses received from the executing party on both the original instruction and the hold/released instructions. This activity is not described in details.	<b>Update Status:</b> Update the status based on the processing, matching and settlement process on the original instruction, taking into account any hold/released instruction received. This activity is not described in details.
<b>Settle trade:</b> Settle the instruction in the custody system. Applies to all instructions, resulting from a split or not.	

## IV. Sequence Diagrams:

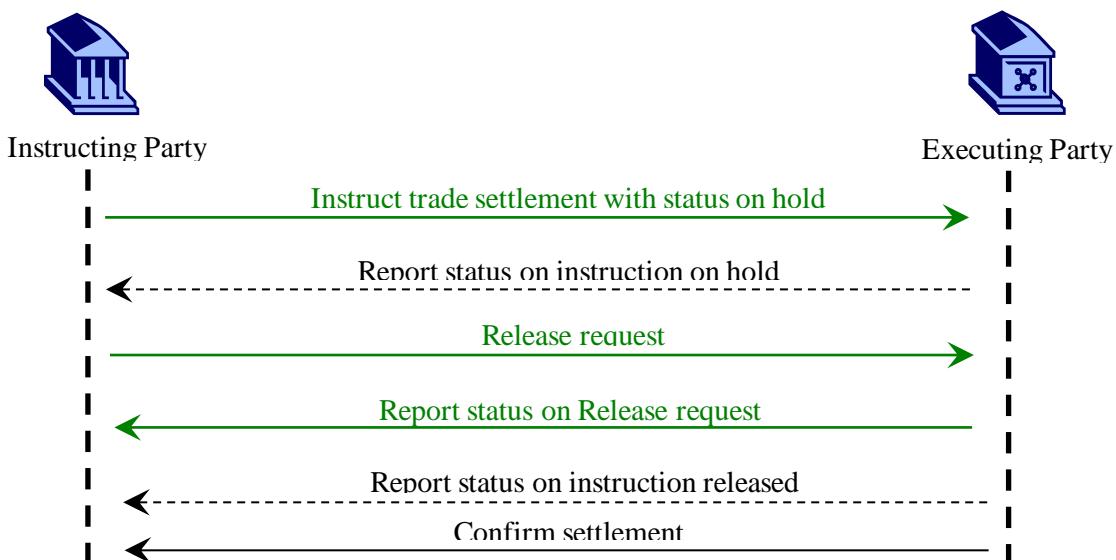

The sequence diagrams show respectively the release process, hold process and partial release process.

In green, the main communication requirements for this process.

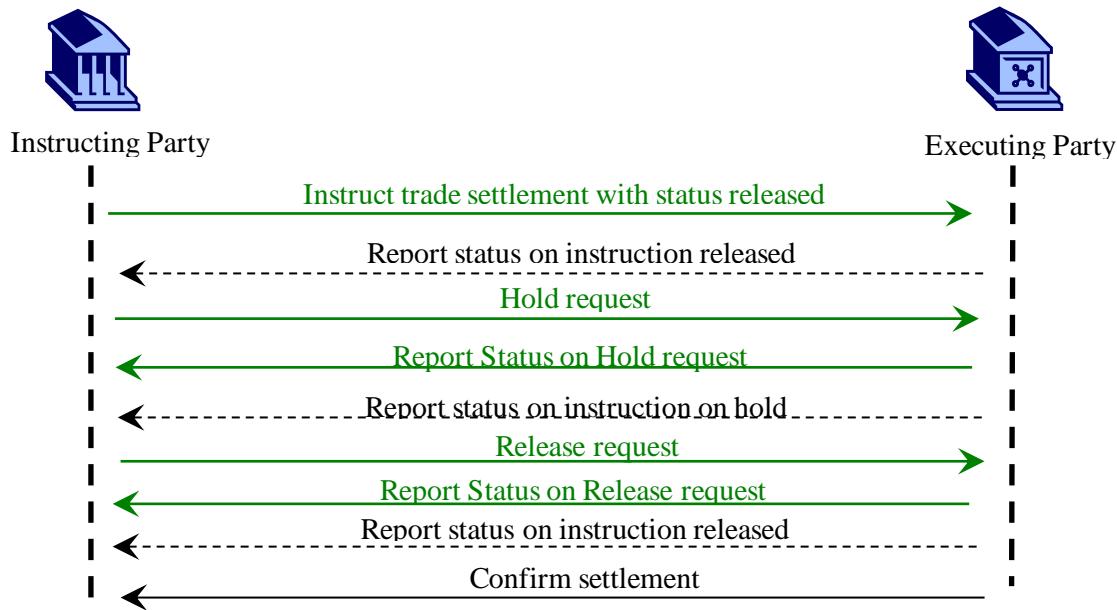

In black, the surrounding communication requirements.

In dotted line, the optional/potential surrounding communication requirements.

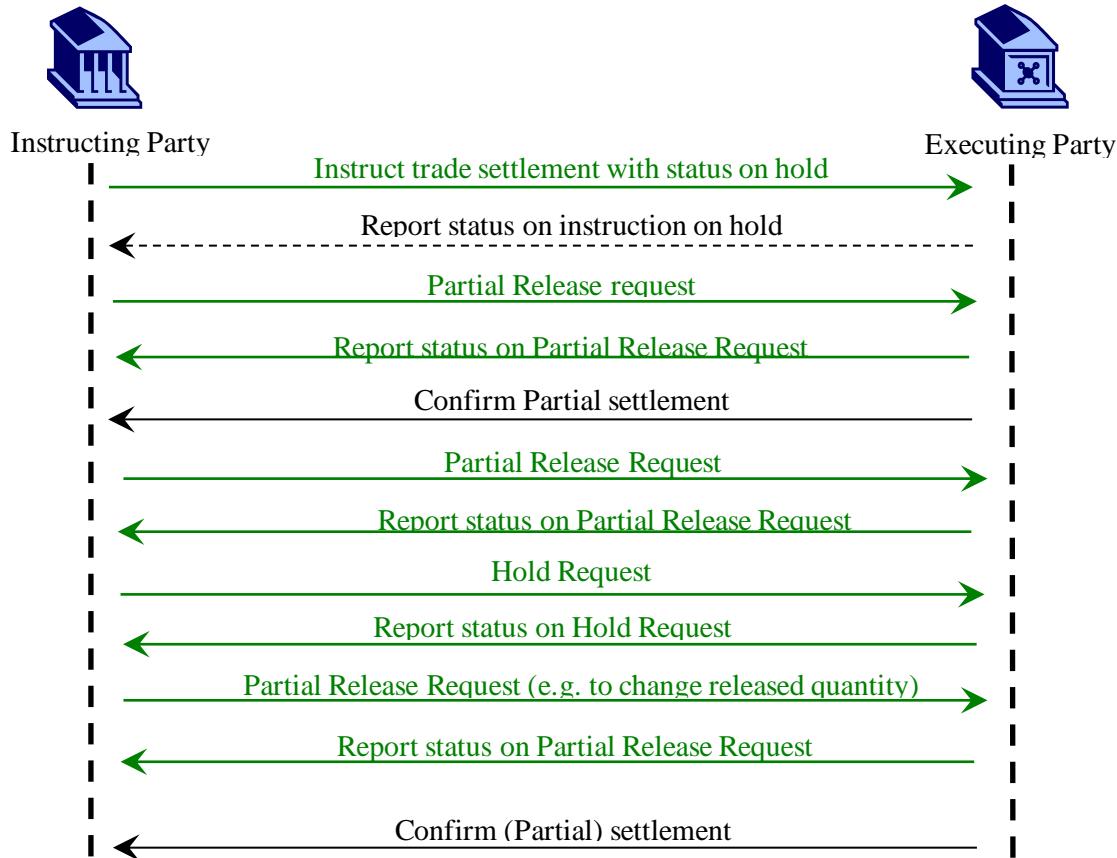

### A. Scenario 1: On hold original instruction being released

**B. Scenario 2: Released original instruction being held then released.**

**C. Scenario 3: On hold original instruction being partial released**

It is to be noted that the hold / (partial) release process may happen more than once on each transaction.

## V. Business data requirements:

For each of the above-described different communication needs, the following business data are required. Focus is on the release/hold process.

### 1. Instruct trade settlement with status on hold:

Business elements	Additional information
10 common elements	See corresponding MP
Country specifics as per local market practice (if any)	See corresponding MP
Hold/release indicator	

### 2. Report status on instruction on hold:

Business elements	Additional information
Status Advice market practice required data.	See corresponding MP
Indication the trade is on hold or released.	

### 3. Instruct trade settlement with status released:

Business elements	Additional information
10 common elements	See corresponding MP
Country specifics as per local market practice (if any)	See corresponding MP
Hold/release indicator	:23G:NEWM

### 4. Report status on instruction released:

Business elements	Additional information
Status Advice (MT 548) market practice required data.	See corresponding MP
Indication the trade is on hold or released.	

### 5. Release request:

Business elements	Additional information
Request reference	
Indication the request is a release	
Reference to the trade to be released	
Quantity of Financial Instrument	Quantity must be less than or equal to the (remaining) quantity to be settled. When quantity is equal to the (remaining) quantity to be settled, the request is considered to be a full release request, otherwise the request is considered to be a partial release request.

### 6. Hold request:

Business elements	Additional information
Request reference	
Indication the request is to hold	
Reference to the trade to be released	

## VI. Market Practice Rules:

1. A settlement instruction with a **hold status must be identified as such**.  
A settlement instruction with a **release status must be identified as such**.
2. **To release** an instruction with a hold status:
  - **a release request must be sent**. This message **must have a linkage** to the transaction reference (message reference in ISO15022) of the instruction on hold.
  - A Partial Release request can only be sent on an instruction which is Matched and on Hold.
3. **To hold** an instruction with a (partial) release status:
  - **a hold request must be sent**. This message **must have a linkage** to the transaction reference (message reference in ISO15022) **of the instruction to hold**.
4. A status report referring to a Release Request / Hold Request must be identified as such.
5. If an Executing Party reverts the (partial) Release status of a trade (e.g. in an end-of-day process) a status report on the instruction must be sent to indicate the instruction is set on Hold.
6. **If a trade is pending or failing because either the instructing party's instruction or the counterparty instruction or both instructions have not yet been released**, the executing party should send a **status report** to inform the instructing party.
7. The (partial) **settlement confirmation(s) must have a linkage** reference that relates **to the original settlement instruction**.

## VII. ISO 15022 illustration:

### Using the MT 540-3, 530 + 548:

Usage of the MT530 as Release or Hold request has replaced the use of the MT540-3 within ISO15022 for the Hold/Release process. This method is better aligned with the message usage within ISO20022, where the sese.030 is used as Release or Hold request.

Illustrations will show both sides of the trade for completeness.

#### 1. Instruct trade settlement with status on hold:

Business elements	ISO 15022 (540-3)
10 common elements	See corresponding MP
Country specifics as per local market practice (if any)	See corresponding MP
Hold/release indicator	:23G:PREA

#### 2. Report status on instruction on hold

Business elements	ISO 15022 (548)
Status Advice market practice required data.	See corresponding MP
Indication the instruction is on hold (before match)	:16R:STAT :25D::IPRC//PPRC :16R:REAS :24B::PPRC//PREA:16S:REAS
Indication the instruction is on hold (after match, before deadline on SD)	:16R:STAT :25D::SETT//PEND :16R:REAS :24B::PEND//PREA :16S:REAS
Indication the instruction is on hold (after match, after deadline on SD)	:16R:STAT :25D::SETT//PENF :16R:REAS :24B::PENF//PREA :16S:REAS
Indication the counterparty instruction is on hold (after match, before deadline on SD)	:16R:STAT :25D::SETT//PEND :16R:REAS :24B::PEND//PRCY :16S:REAS
Indication the counterparty instruction is on hold (after match after deadline on SD)	:16R:STAT :25D::SETT//PENF :16R:REAS :24B::PENF//PRCY :16S:REAS
Indication both instructions are on hold (after match befo deadline on SD)	:16R:STAT :25D::SETT//PEND :16R:REAS :24B::PEND//BOTH :16S:REAS
Indication both instruction are on hold (after match after deadline on SD)	:16R:STAT :25D::SETT//PENF :16R:REAS :24B::PENF//BOTH

	:16S:REAS
Transaction type (copy from instruction)	:22F::SETR//4!c SMPG recommendation: Do not use PREA as it conflicts with CSDR requirements. Transaction type of original transaction should be used.

**3. Instruct trade settlement with status released:**

Business elements	ISO 15022 (540-3)
10 common elements	See corresponding MP
Country specifics as per local market practice (if any)	See corresponding MP
Hold/release indicator	:23G:NEWM

**4. Report status on instruction released:**

Business elements	ISO 15022 (548)
Status Advice (MT 548) market practice required data.	See corresponding MP
Indication the trade is released and no other factors are blocking processing of trade (before match)	:16R:STAT :25D::IPRC//PPRC :16R:REAS :24B::PPRC//NEXT :16S:REAS
Indication the trade is released and no other factors are blocking processing of trade (after match, before deadline on SD)	:16R:STAT :25D::SETT//PEND :16R:REAS :24B::PEND//FUTU :16S:REAS
Indication the trade is released and no other factors are blocking processing of trade (after match after deadline on SD)	:16R:STAT :25D::SETT//PENF :16R:REAS :24B::PENF//CYCL :16S:REAS
Indication the trade is on hold or released. Transaction type (copy from instruction)	:22F::SETR//4!c (other than PREA)

**5. Release request:**

Business elements	ISO 15022 (530)
Request reference	:20C::SEME//16x
Indication the request is a release	:22F::SETT//YPRE (530)
Reference to the trade to be released	:20C::PREV//16x

**6. Hold request:**

Business elements	ISO 15022 (530)
Request reference	:20C::SEME//16x
Indication the request is to hold	:22F::SETT//NPRE (530)
Reference to the trade to be released	:20C::PREV//16x

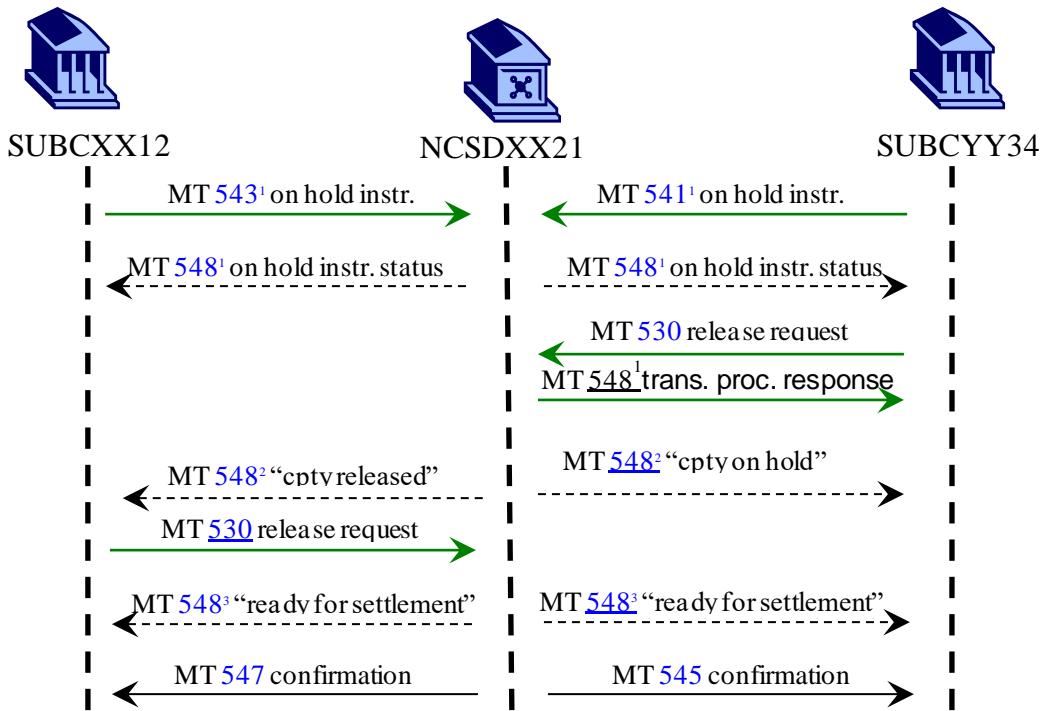

**7. Response on Release / Hold request:**

Business elements	ISO 15022 (548)
-------------------	-----------------

## Hold-Release MP

Status Advice market practice required data.	See corresponding MP
Indication the Release / Hold request is accepted	:16R:STAT :25D::TPRC//PACK :16S:STAT
Indication the Release / Hold request is processed	:16R:STAT :25D::TPRC//MODC :16S:STAT
Indication the Release / Hold request is rejected, provide reason for explaining the rejection	:16R:STAT :25D::TPRC//REJT :16R:REAS :24B::REJT//xxxx :16S:REAS :16S:STAT
Indication the Release / Hold request is denied, provide reason for explaining the denial	:16R:STAT :25D::TPRC//DEND :16R:REAS :24B::DEND//xxxx :16S:REAS :16S:STAT
Reference to Transaction Processing Command (MT530)	:20C::PREV//16x

### A. Scenario 1, instruction originally on hold released for settlement.

#### 1. Instruction on hold:

SUBCXX12 and SUBCYY34 send a pre-matching/preadvice instruction to the CSD.

## IX. Partial release illustration

### A. High level overview

The partial release functionality is offered by different CSDs/ICSDs or Settlement platforms and some differences may exist. The purpose of this document is not to provide a business recommendation on how the partial release should be offered by the different settlement platforms. However, in order to provide recommendations on the standard to be used for the reporting some assumptions were taken.

#### Assumptions:

- Partial release can only be triggered from delivering side.
- In order to increase a pending Partial Release request, the instruction must be put back on hold
- Quantity in release message must be less than the remaining quantity to be settled
- Daily reversal of Partial Release in T2S will not be part of Global Market Practice
